HOTSOX

THE ULTIMATE COLD KILLERS FOR YOUR FEET . . .

These are made from moisturewicking fleece, keeping your feet warm and comfortable.

The socks are double sided and flatlock stitched - no raised seams to cause discomfort.

They have a special heel protector and are cut to fit perfectly.

Moisture is always present inside any diving drysuit, often produced by the diver's body. Hot Sox Socks wick this moisture away from the skin to keep you comfortable.

- Manufactured from high wicking fleece
- Flat-locked stitched
- Additional heel protector
- For dry, warm and comfortable feet
