JET FINS
WITH METAL BUCKLE

Our Jet Fins are manufactured from a very high quality rubber, using the latest manufacturing processes.

They are very weighty and robust - specifically designed for maximum endurance, exceptional propulsion and the ultimate finning power.

Manufactured from a very high quality of rubber, using the latest manufacturing processes. They have a great weight, are extremely robust and have been specifically designed for maximum endurance, exceptional propulsion and the ultimate finning power.

Originally developed for commercial and military use but due to their compact design, they are equally suited to wreck diving, cave dives and technical diver applications, where a shorter length dive fin is preferred. For many years, these diving fins have been the preferred choice of our military divers in addition to most commercial, technical and deep divers, around the globe.

SUPPLIED WITH
Traditional metal 'clamp' style fin strap buckles.

NOTE
This style of fin is not compatible with Northern Divers Spring Fin Straps.

SIZES

M	UK 4-5
L	UK 6-7
XL	UK 8-9
XXL	UK 9-10
XXXL	UK 11+

The listed fin sizes are for wetboots or standard width drysuit boots. For wide fitting drysuit boots, please select one size higher than your drysuit boot size.
