POSEIDON SE7EN

In a world full of compromise, we escape by visiting the one place that doesn't: the ocean. Yet when we get there, we are forced to compromise. Not any more…

The system comprises a breathing loop (mouthpiece, hoses, counter lungs, backpack and scrubber) with associated electronics module (with Smart battery and O2 sensors), and two independent gas cylinders. One contains 100% compressed oxygen which is added to the breathing loop as the diver consumes it.
The second cylinder typically contains compressed air "diluent" to compensate for compression in the breathing loop as the diver goes deeper. It's also a backup system, containing enough oxygen for the diver to breathe directly in an emergency.

The SE7EN has big advantages over traditional open circuit equipment:

- > Get closer to marine life
- > Much more time underwater
- > Patented safety technology
- > Proven performance
- > Expandable system
- > Recreational or 100 m technical rebreather
- > Comfortable mouth-piece with patented BOV
- > Dive Management System
- > Plug and play with Dive-by-Wire TM
- > Bluetooth connectivity
- > Automatic start-up testing procedure

POSEIDON SE7EN SPORTS EDITION

SE7EN SPORT PACKAGE

- > Poseidon SE7EN without Cover
- > Repackable Scrubber
- > Tank Belt MKVI / SE7EN
- > 11 inch adapter Complete
- > Battery Module - Rec 40 (Green)
- > Rebreather BCD
- > 3L Steel Cylinder Set 300 Bar

Art. no.	Description
6012-013	SE7EN SPORT Package EU version
6012-014	SE7EN SPORT Package US version *Cylinders and Cylinder valves are not included in the US version and must be purchased separately.*

POSEIDON SE7EN REC EDITION

SE7EN REC PACKAGE

- > Poseidon SE7EN
- > Repackable Scrubber
- > Tank Belt MKVI / SE7EN
- > 11 inch adapter Complete
- > Battery Module - Rec 40 (Green)
- > Rebreather BCD, Recreational Counter Lungs or Back Mounted Counter Lungs
- > 3L Aluminium Cylinder Set 200 Bar or 3L Steel Cylinder Set 300 Bar

Art. no.	Description
6012-015	SE7EN REC Package EU version
6012-016	SE7EN REC Package US version *Cylinders and Cylinder valves are not included in the US version and must be purchased separately.*

POSEIDON SE7EN TEC EDITION

Recommended add on:

Third sensor holder + third party computer and cable or another M28, cable and C-pod

SE7EN TEC PACKAGE

- > Poseidon SE7EN
- > Repackable Scrubber
- > Tank Belt MKVI / SE7EN
- > 11 inch adapter Complete
- > Battery Module - Deep (Black)
- > Counter Lung Tech Pack or Back-Mounted Counter Lung with Manual Injection Pack
- > Poseidon Harness w. backplate
- > Poseidon Wing WRB
- > RB Handle
- > Cylinder Inversion Kit
- > Poseidon M28 Computer - CCR Ready
- > Connecting Cable M2 1.25m / 4 ft
- > 3L Steel Cylinder Set 300 Bar

Art. no.	Description
6012-017	SE7EN TEC Package EU version
6012-018	SE7EN TEC Package US version *Cylinders and Cylinder valves are not included in the US version and must be purchased separately.*

POSEIDON SE7EN CUSTOM-BUILD:

Art. no.	Name	Description
6012-010	POSEIDON SE7EN	EU version *incl*. cover and battery charger.
6012-011	POSEIDON SE7EN	US version *incl*. cover and battery charger

For EU orders, the Poseidon SE7EN must ship with cylinders from the factory. Cylinders are not included within either the EU or US article numbers and cylinder type must be specified at the time of ordering for EU purchases.

POPULAR ACCESSORIES:

Art. no.	Name	Description
0600-200	POSEIDON M28 Dive Computer	It boasts maps, graphics, GPS, Dive-By-Wire™, and a host of features that deliver class-leading functionality
0005-100	BCD QMR	Designed for easy assembly. The ideal solution for quick BCD attachment
0000-468	11 Inch Adapter	The value choice for attaching your BCD
0100-006	Jetstream Mk3 Octopus	The recommended Octopus for the POSEIDON SE7EN
0650-032	Wing Man, Side Sling Case	Bring your bailout tank with you without bungees and straps
0100-005	Jetstream Mk3 (Black)	Perfect regulator for your bailout kit

COUNTER LUNGS

Art. no.	Description
6011-049	Standard Counter Lungs For the recreational rebreather diver. 6.2 liter volume.
6011-050	Large Counter Lungs For the larger or technical rebreather diver. 8.2 liter volume.

MATERIAL:

Ballistic Nylon

TECHNICAL FEATURE:

6.2 or 8.2 liter volume.

TECHNICAL COUNTER LUNGS PACK

Art. no.	Description
6011-035	Technical Counter Lungs Pack incl. Manual injektion Pack. For the technical rebreather diver. 8.2 liter volume.

MATERIAL:

Ballistic Nylon

TECHNICAL FEATURE:

8.2 liter volume. Manual addition of oxygen and diluent gases.

BATTERY UPGRADE

40M REC, 60M TRIMIX AND DEEP

Recreational or Technical Rebreather.

A simple battery change upgrades your SE7EN to enable deeper dives, decompression management and mixed gases. This easy upgrade path makes the SE7EN the perfect machine to accompany on your journey as you gain experience as a rebreather diver.

Your battery is highly personalized. It saves your dive logs and nitrogen loading. It also contains a light and speaker that alert your buddy of any alarms. If you put your battery into somebody else's SE7EN, the more conservative settings will be used for your next dive.

Art. no.	Description	
6011-005	Battery Module – Rec 40	●
6011-029*	Battery Module – Trimix 60	○
6011-036	Battery Module – Deep	●

MATERIAL:

Water sealed battery pack in robust plastic.

TECHNICAL FEATURE:

The battery will upgrade your unit to the specific depth limit. The deeper version will also let you specify the trimix used through the PC config program.

BACK MOUNTED COUNTER LUNGS

For divers preferring the back mounted set-up of their rebreather wing/harness.
Made for the Poseidon Rebreather Wing/Harness the Back Mounted Counter Lungs have the same material and specifications as the technical counter lungs.
Over-the-Shoulder or Back Mounted Counter lungs is a matter of personal preference.

Art. no.	Description
6011-066	Back Mounted Counter Lungs For the technical rebreather diver. 8.2 liter volume.

MATERIAL: Ballistic Nylon

BMCL ADAPTORS FOR MANUAL INJECTION

Art. no.	Product Name
6011-068	BMCL Adaptors incl. elastic band Adaptors needed to use Manual injection valves.

BREATHING LOOP CC HOSE

These hoses will make it possible for you to customize the lengths of the hoses to fit you better.

The standard length sold with the POSEIDON SE7EN is 346 mm.

Art. no.	Description
0132-000	CC Hose 346 mm, pair.
0135-000	CC Hose 286 mm, pair.
0135-001	CC Hose 396 mm, pair.

CYLINDER BRACKET COMPLETE

Art. no.	Description
0000-467	Cylinder Bracket Complete

MOUTHPIECE G7

Art. no.	Description
0005-055	Mouthpiece G7

BLIND PLUG MOUTHPIECE

Art. no.	Description
0000-368*	Blind Plug Mouthpiece

LP-HOSE DIL 30 CM

Art. no.	Description
0132-006	LP-Hose DIL 3/8"-3/8"M, 30cm

BATTERY CHARGER

Art. no.	Description
6011-015	Battery Charger

POWER ADAPTER 12V

Art. no.	Description
6010-290	Power Adapter 12V

PLUG ADAPTERS 4-PLUG KIT

Art. no.	Description
6010-291	Plug Adapters 4-PLUG KIT

MIFLEX HOSE POLYURETHANE

The Miflex Polyurethane hose delivers diluent air to the POSEIDON SE7EN mouthpiece.
This hose is of the highest caliber and is an excellent choice for use with both the POSEIDON SE7EN and Poseidon Xstream and Jetstream regulators.

Art. no.	Description
0130-004	LP Hose Polyurethane 9/16-18, 90cm
0130-032	LP Hose DIL 9/16-18, 20cm
0130-033	LP Hose O2 9/16-18, 20cm
0130-034	LP Hose DIL 9/16-18, 20cm w. 90 angle
0130-035	LP Hose O2 9/16-18, 20cm w. 90 angle
0132-007	LP Hose DIL 3/8M-9/16"F, 38cm
0132-008	LP Hose O2 3/8M-9/16"F, 70cm

3RD CELL HOLDER

Poseidon's Third Cell Holder enables you to add a third cell to your rebreather loop to monitor PPO2 on a back up set of electronics. Poseidon's flexible solution enables you to choose whichever back up computer and O2 sensor cell you prefer to use.

Art. no.	Description
6011-064	3rd Cell holder

3RD CELL CALIBRATION KIT

Calibration kit for use with 3rd cell holder. Makes O2 cell calibration easy to perform together with external computers.

Art. no.	Description
6011-055	3rd Cell Calibration Kit

3RD CELL HOLDER WITH T-COUPLING

Art. no.	Description
6011-052	3rd Cell holder with T-coupling

MANUAL INJECTION PACK

Art. no.	Description
6011-051	Manual Injection Pack

MANUAL INJECTION PACK BMCL

Art. no.	Description
6011-048	Manual Injection Pack for Back Mounted Counter Lungs 2 hose 110 cm

CYLINDER INVERSION KIT

Art. no.	Description
6011-054	Cylinder Inversion Kit

CYLINDER QMR SET

The Cylinder Quick Mount Release (QMR) attaches your cylinders even quicker than before and with a perfect fit every time, just as you want them to be. The QMRs are made out of steel and will snap into place on the side of your scrubber canister house.

Art. no.	Description
0415-002	Cylinder QMR Set

TANK BAND STANDARD

COLORS

Black

Art. no.	Description
0000-116	Tank Band Standard

GIGASEPT

Art. no.	Description
0050-003*	Gigasept disinfection liquid

REPACKABLE SCRUBBER CARTRIDGE

The scrubber is tested in accordance with the EN14143:2013 with the Poseidon SE7EN rebreather.

Art. no.	Description
6011-069	Repackable Scrubber Cartridge

SCRUBBER CARTRIDGE FILTER

Art. no.	Description
6011-070	Scrubber Cartridge Filter Pair

TANK STRAP & BUCKLE

COLORS

Black

Art. no.	Description
0415-001	Tank Strap & Buckle (Pair L&R)

MATERIAL:

Stainless Steel.

POSEIDON SOLID STATE O2 SENSOR

Art. no.	Description
6011-063	Poseidon Solid State O2 Sensor (Currently only sold as part of CPOD packages)

O2 SENSOR (MOLEX)

Art. no.	Description
6010-206	O2 Sensor (Molex)

DISPLAY GAUNTLET

COLORS

Black

Art. no.	Description
0605-001	Display Gauntlet S
0605-002	Display Gauntlet L

MATERIAL:

Ballistic Nylon 1680, YKK Waterproof Zipper, Octupus Velcro.

RB HANDLE

The stainless steel handle is easily mounted in combination with QMR adapter or 11 inch adapter.
This will make your rebreather easy to grab and carry.

Art. no.	Description
6011-019	RB Handle

MATERIAL:

Stainless Steel

TECHNICAL FEATURE:

Quick mount/dismount

QMR

The Quick Mount/Release adapter presents the fastest solution to mount and dismount your Poseidon SE7EN to your BCD/Wing.

Art. no.	Description
0005-100	QMR Rebreather BCD

MATERIAL:

Stainless Steel

TECHNICAL FEATURE:

Quick solution for mount/dismount

11 INCH ADAPTER

This adapter enables the tightest fit between your Poseidon SE7EN and your BCD/Wing. This is the choice if you don't dismount your unit from the buoyancy device too often.

Art. no.	Description
0000-468	11 inch Adapter Complete

MATERIAL:

Stainless Steel

TECHNICAL FEATURE:

Low profile

POSEIDON M28 COMPUTER

"The world's most powerful dive computer"

The Poseidon M28 Dive Computer has set new standards for dive computer performance. It boasts maps, graphics, GPS, Dive-By-Wire™ and a host of features that deliver class-leading functionality that's incredibly intuitive to use.

COMPUTER & ACCESSORIES

POSEIDON M28

The main features of the M28 include:

> Powerful graphics thanks to a class leading 2.8" TFT LCD Color Display

> Highly intuitive user interface with two button control

> Enhanced SE7EN/MKVI functionality with the M28's Rebreather Management System

> Dive-By-WireTM enables you to make changes to set-points and gases during dive. Integration is possible with Poseidon Pod Systems, HUD and HP Sensors

> Dual Deco Algorithm (DCAP and Bülhmann ZHL16C with gradient factors)

> Real-time GPS Surface Positioning and maps

> Depth rated to 200M/656 ft

Art. no.	Description
0600-200	Poseidon M28 Computer. Incl. Firmware CCR and Firmware Advanced OC. Carrying case, Dust bag, Charging cable and Bungee cord.
0600-210	Poseidon M28 Computer (0600-200) and CPOD/Solid State Sensor kit (6011-064)

M28 PROTECTIVE COVER

Art. no.	Description
0605-000	M28 Protective Cover, Black.
0605-030	M28 Protective Cover, Red

M28 SCREEN PROTECTION

Art. no.	Description
0002-164	M28 Screen Protection

CPOD INCL. SSO2 AND CABLE

Solid State O2 Sensor features:

> Absolute oxygen measurement

> Factory calibrated, no need for user calibration

> Fast and accurate

> Low power consumption

Art. no.	Description
6011-064	CPOD, T-Coupling, Poseidon Solid State O2 Sensor and Connecting Cable 1.25m/4ft

POSEIDON M28 CHARGING CABLE

Art. no.	Description
0005-042	M28 Charging Cable

POSEIDON M28 BUNGEE CORD

Art. no.	Description
0000-938	M28 Bungee Cord

O2 SENSOR (MOLEX)

Art. no.	Description
6010-206	O2 Sensor (Molex)

POSEIDON SOLID STATE O2 SENSOR

Art. no.	Description
6011-063	Poseidon Solid State O2 Sensor (Currently only sold as part of CPOD packages)

CONNECTING CABLE M²

Art. no.	Description
0000-690	Connecting cable M², 1.25 m/4 ft.

BUS BLOCK F²M

Art. no.	Description
6011-061*	BUS Block F²M

BUS BLOCK M²F

Art. no.	Description
6011-062*	BUS Block M²F

T-COUPLING

Art. no.	Description
6011-059	T-Coupling

CPOD

The Poseidon C-POD uses an integrated CAN bus to directly connect to the SE7EN or M28 network to monitor and log the required parameters.

Typical adaptations of the Poseidon C-POD with a M28 includes:

> Monitor loop PO2 individually or as back up.

> Deploy the Poseidon mouthpiece and HUD system.

> Deliver life-saving information on PO2, loop status and calculated decom pression.

Art. no.	Description
6011-058	CPOD

CPOD INCL. T-COUPLING

Art. no.	Description
6011-060	CPOD incl. T-Coupling

BLIND PLUG BUS

Art. no.	Description
0605-005	Blind Plug BUS

CYLINDER ALU 3LTR 200 BAR

Diameter: 117 mm / 4.61 Inch
Length: 440 mm / 17.32 Inch
Weight: 3.60 kg / 7.9 lb (US)
Test Pressure: 312 Bar / 4,525 PSI
Thread Specification: 97/23/EC

Art. no.	Description
0400-100	Cylinder Aluminium 3Ltr 200 Bar DIL
0400-101	Cylinder Aluminium 3Ltr 200 Bar O2

MATERIAL:

Aluminium.

TECHNICAL FEATURE:

Working Pressure Diluent: 200 Bar / 2,900 PSI.
Working Pressure Oxygen: 135 Bar / 2,000 PSI.

CYLINDER STEEL 3LTR 300 BAR

Diameter: 100 mm / 3.94 Inch
Length: 510 mm / 20.08 Inch
Weight: 4.80 kg / 10.58 lb (US)
Test Pressure: 490 Bar / 7,107 PSI
Thread Specification: 97/23/EC

Art. no.	Description
0400-103	Cylinder Steel 3Ltr 300 Bar
0400-119	Cylinder Steel 3Ltr 300 Bar O2

MATERIAL:

Chromium molybdenum steel.

3.0 LTR ALU CYLINDER SET 200 BAR WITH VALVES

Art. no.	Description
0405-000	3L Aluminium Cylinder Set - EU

3.0 LTR STEEL CYLINDER SET 300 BAR WITH VALVES

Art. no.	Description
0406-003	3L Steel Cylinder Set - EU

CYLINDER VALVE SINGLE

Art. no.	Description
0410-100**	Cylinder Valve M25x2 Single G5/8” 200 Bar

CYLINDER VALVE SINGLE O2

Art. no.	Description
0410-101**	Cylinder Valve M25x2 Single M26x2 150 Bar O2

CYLINDER VALVE SINGLE 90°

Art. no.	Description
0410-155*	Cylinder Valve M25x2 Single G5/8” 200 Bar 90°

CYLINDER VALVE SINGLE O2 90°

Art. no.	Description
0410-156*	Cylinder Valve M25x2 Single M26x2 200 Bar 90° O2

CYLINDER VALVE DOUBLE

Art. no.	Description
0410-120**	Cylinder Valve M25x2 Double G5/8” 200 Bar

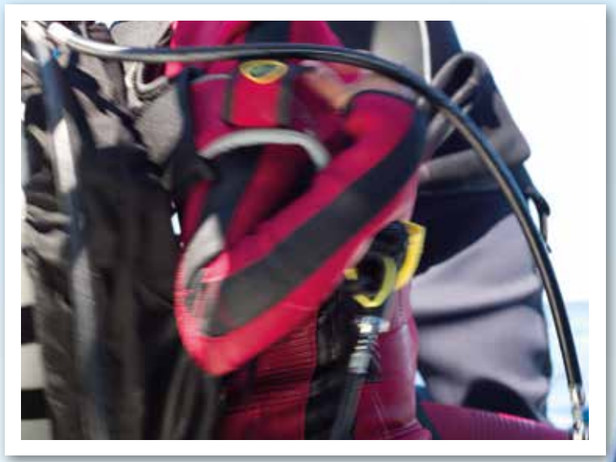

INLINE VALVE BLACK

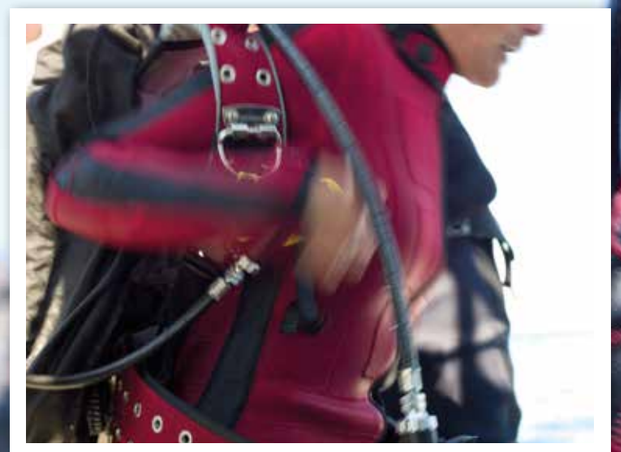

Art. no.	Description
0410-161	Inline Valve 3/4”, G5/8” 237 Bar, US with Burst Disk
0410-171	Inline Valve M25x2, G5/8” 232 Bar, EU
0410-173	Inline Valve M25x2, G5/8” 300 Bar, EU

INLINE VALVE GREEN O2

Art. no.	Description
0410-160	Inline Valve 3/4”, G5/8” 237 Bar O2, US with Burst Disk
0410-170	Inline Valve M25x2, M26x2 232 Bar O2, EU
0410-172	Inline Valve M25x2, M26x2 300 Bar O2, EU

POSEIDON XSTREAM

**The benchmark for high performance.
Whether you dive with air, trimix or oxygen,
the Xstream outperforms all other regulators.
Certified to 200m. As used by the US Navy.**

KEY PERFORMANCE FEATURES:

- > Side purge prevents current-induced free flow
- > Side vent diverts bubbles from face
- > EAN 40 ready and compatible
- > Works perfectly either way up, or from left or right side
- > Only regulator certified for 200 m / 656 ft
- > No environmental sealing required for cold water

Art. no	Product Name
0100-000	Xstream Deep MK3, for air, nitrox 50% and trimix
0100-001*	Xstream Duration M26 (EU), Green, for oxygen. Excl. LP-hose.
0100-003	Xstream Octopus, Yellow
0100-007	Xstream Duration G5/8" (US), Green, for oxygen. Excl. LP-hose.
0100-010	Xstream Black, for air, nitrox 50% and trimix

COLORS

Black Yellow Green

SINGLE KIT XSTREAM BLACK

- > 1st Stage Xstream Black Regulator
- > Xstream Octopus Black/Yellow incl. Hose
- > Xstream Black/Black incl. Hose
- > Pressure Gauge Yellow with Hose
- > Neckstrap
- > User guide

Art. no	Product Name
0100-590	Xstream Black w. Octo & Ye. PSG Bar
0100-591	Xstream Black w. Octo & Ye. PSG Psi
0100-578	Xstream Cold Water Double kit, incl. 2 pcs 1st stage, 2 pcs 2nd stage, LT hose 60 & 215 cm

Hardcore, redefined. The preferred performance regulator of the US Navy, US Coastguard, and German Bundeswehr, brings divers the ultimate in performance in all water conditions and at all depths (certified to 200m/656 ft).

SINGLE KIT XSTREAM DEEP

- > 1st Stage Xstream Regulator
- > Xstream Octopus Yellow incl. Hose
- > Xstream Deep MK3 incl. Hose
- > Neckstrap
- > With or without Pressure Gauge Black incl. Hose
- > User guide

Art. no	Product Name
0100-560	Xstream Deep w Octo & Black PSG
0100-580	Xstream Deep w Octopus

MATERIAL:

Durable PCS housing with metal mechanism and rubber parts.

TECHNICAL FEATURES:

- > Trimix, nitrox 50% and air
- > 5 LP and 2 HP-ports
- > Low WOB - Servo assisted
- > Certified to 200 m
- > O2 Certfied

XSTREAM RANGE

POSEIDON KEEPS INNOVATING

The objective; design the most reliable HP valve in the world. Every engineer knows the benefits of using balls in valve arrangements, since they will never be misplaced and will always find their perfect position. Unfortunately, varying upstream pressures will either push the ball too fiercely into the seat or leave it unsecurely loose, giving unbalanced characteristics.

By inventing the floating seat (which automatically repositions the ball) the increased upstream pressure is balanced equally with increased and counter-acting compression forces from the pressure adjustment spring, maintaining the benefits of having a perfect ball as the sealing element. The Xstream regulator is also self-balancing, which gives the same high performance irrespective of the pressure in the cylinder. When the seat is moved upwards by the high pressure, the design causes the upper pressure spring to compress and thus exactly self-balance the powers of pressure.

Xstream also has a built in anti freeze protection in its construction. TDA (Thermo Dynamic Antifreeze) ensures that the through-flowing water keeps the ice away, entirely without fluids or extra diaphragms.

The Xstream Deep: The Xstream Deep: rated for use down to 200m and for use with mixtures containing helium (He) and a maximum O2 content of 40%. Colour coded Black on both stages to avoid confusion with other gas mixes. All Xstream hoses are oxygen clean and delivered in a sealed bag and they are available in the following lengths: 70, 90, 150, 215 cm (28, 36, 60, 85 inches).

Duration: Colour coded green for oxygen enriched gas on both first and second stage to avoid confusion with other mixes. This regulator fulfills the O_4 requirements for O2 content up to 99,95% O_2: O_2-engineered O_2-compatible, O_2-clean and O_2-approved. All Xstream hoses are oxygen clean and delivered in a sealed bag and they are available in the following lengths: 70, 90, 150, 215 cm (28, 36, 60, 85 inches).

XSTREAM DEEP PACKAGE

- > Regulator
- > Neck strap
- > User guide

LP-hoses are available in a range of lengths

WHO SHOULD BUY

Deep diver, Recreational diver, Technical diver, Commercial diver

XSTREAM DURATION PACKAGE

- > Regulator
- > Neck strap
- > User guide
- > Comes with G5/8 or M

LP-hoses are available in a range of lengths

WHO SHOULD BUY

Technical diver, Commercial diver

O_4 REQUIREMENTS FOR SAFE OXYGEN USAGE

Xstream fulfils the O_4 requirements for safe oxygen (O_2) usage. These are;

O_1 – oxygen engineered
O_2 – oxygen compatible materials
O_3 – cleaned for oxygen use
O_4 – oxygen approved

O_1, oxygen engineered – constructing a regulator for oxygen use requires special engineering skills. It is not as simple as taking any regulator and changing the materials to be so-called “oxygen compatible”. Care must be taken, for example, to minimise the use of polymeric materials, avoid intersecting holes and sharp turns, minimise flow velocity, evaluate heat transfer and optimise it, ensure the product does not produce contaminants during assembly, make cleaning and inspection efficient, etc.

O_2, oxygen compatible materials – the term “oxygen compatible” must not be taken too literally; it is meaningless to refer to a material as being “perfectly oxygen compatible”. It is more a matter of choosing materials according to a set of factors which will result in the lowest possible risk of causing a severe error of any kind. For oxygen use, the variety of materials that come into question is very much limited, since factors such as oxygen index, auto ignition temperature, heat of combustion, toxicity of fumes, risk for particle impact, etc must be considered.

O_3, oxygen cleaned – is a standard where a certain level of contaminants can be accepted to expose a tolerable risk for ignition. Special methods and detergents must be used to obtain the correct cleanliness level. Poseidon prefers to call it “cleaned for oxygen use”, rather than ”oxygen cleaned”, which can be misleading.

O_4, oxygen approved – The European Union Directive for Personal Protective Equipment requires that SCUBA regulators must be tested and approved by an independent notified body. Regulators for oxygen use must pass more tests specifically for oxygen, e.g. adiabatic compression shock testing.

JETSTREAM

THE ULTIMATE IN RELIABILITY

Controlling the power of a massive airflow, astonishingly reaching some 2100 litres/minute is an engineering challenge. The solution to this was to obtain a precision regulation, keeping breathing pressure to within +/- 5 mm.w.c throughout the inhalation cycle, regardless of depth and demand. Called a servo-assisted valve, it works in the same way as does the power steering you may have on your car – it's all about compensation.

Prior to diving, when you pressurize the regulator, the main blue bladder valve is inflated with the interstage pressure, along with all inner volumes including the upstream side of the servo valve.
When this is done a "whooshing" sound of streaming air is heard.
The system is then activated. On inhalation, the forces from the inhalation diaphragm easily overcome the light forces to crack open or "tilt" the servovalve and in turn evacuate all inner volumes. The main blue bladder valve then collapses and in turn lets an amount of gas out, corresponding to the actual demand.

This technology ensures that the lightest possible effort can result in an almost limitless amount of gas on inhalation.

All the more astonishing is the fact that Poseidon introduced this technology to the market as far back as 1981.

The Jetstream: traditionally popular with technical divers as well as the Swedish and US navies. An easy breathe at any depth, the second stage incorporates a safety valve that allows you to continue to breathe normally in the unlikely event of abnormally high pressure air being delivered to the second stage. Approved to EN250 cold water standard.

COLLECTION COLORS

Blue Red Black Grey Yellow

> With or without Pressure Gauge Black incl. Hose
> User guide

Art. no.	Description
0100-555	Single Kit Jetstream MK3
0100-556	Single Kit Jetstream MK3 incl. PSG Black

MATERIAL:

Durable PVC housing with metal mechanism and rubber parts.

TECHNICAL FEATURES:

> Use either way up
> Robust, durable
> Approved for cold water diving
> Reliable high performance

POSEIDON FACT

The Poseidon Xstream 1st Stage is the only regulator in the world that does not require environmental sealing for use in cold water.

JETSTREAM PACKAGE

> Regulator with 70 cm hose
> User guide

USERS

> US Navy
> Italian police
> Technical divers

CYKLON

EVEN MORE EXPERIENCED THAN YOU...

A regulator must possess a set of functions which are unaffected by the different environments it will see during its lifetime. Examples of these functions include inhalation resistance, exhalation bubble distraction, noise and leak tightness – to name just a few. Different environments such as cylinder pressure, diving attitude, depth, temperature, gas, type of water, the diver can have an effect on these functions.

When a new regulator is released on the market, it has to pass the EN 250 test. This test represents one single environment; the manufacturer may have managed to test perhaps another hundred such situations, which is good but not necessarily enough. Only after years and years of actual use by divers around the world will the manufacturer collect all the information which can guarantee a perfect performance under all circumstances. This of course, takes time…

The Poseidon Cyklon Junior was introduced in 1958. In small steps, it has been gradually improved every year, based on both divers' experiences and techno-logical evolution.

The expression "been there – done that" applies to The Poseidon Cyklon more than any other regulator on the market.

The Cyklon: First launched in 1958, constant improvements have resulted in a really tough, reliable workhorse, and is the choice of many navies around the world. Approved to EN250 cold water standard.

COLLECTION COLORS

Plastic/Black Metal Yellow

POSEIDON EBS MKII

The Poseidon EBS (Emergency Breathing System) is a Category A Escape device Compressed Air System.

MATERIAL:

Cylinder capacity 0.3 liter, 200 bar/2900 psi.
60 litre compressed air.
Xstream EBS mkII 1st stage regulator.
Low Pressure Hose Flexible 24".
Cyklon EBS 2nd stage regulator.

TECHNICAL FEATURES:

The EBS is complies with EN250 ColdWater and CAP1034.

SERVO(PILOT) VALVE TECHNOLOGY

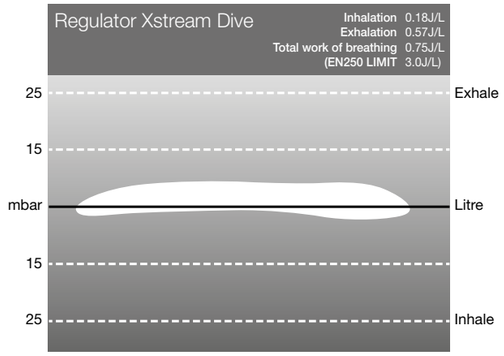

To achieve high air flow on demand, the diameter of the supply nozzle in the second stage has to be of sufficient size: however this impacts on other aspects of a regulator's design. This nozzle is covered by a plate or "valve seat", which ensures that gas does not escape when not in use or during exhalation. Force is required to hold the plate in place against the gas pressure – assuming that it is a downstream opening valve seat, as is the case in most conventional regulators. It is the force required to "crack open" the valve – the inhalation effort – which divers want to keep to a minimum.

As mentioned, with the nozzle diameter "set" according to physical laws, therefore the corresponding force to seal the nozzle is also predetermined. These laws mean that to make a high performing and enjoyable regulator, the given factors would result in either a huge diaphragm to obtain the necessary forces, or a high inhalation effort.

One solution that does reduce the inhalation effort is to use a sharp edge against the valve seat – this reduces the force needed to keep the valve closed. This is not satisfactory as it dramatically increases wear. Another option is to use Venturii-effects to fool the regulator diaphragm into believing that there is a greater demand due to local under-pressure zones near the diaphragm. However this too is not satisfactory as the Venturii-effect is dependent on depth and breathing pattern which means that performance will be affected by depth which is never good.

Our solution is Servo technology. It is like power steering in a car. A servo controlled valve is basically made of two valves; one very small and one bigger. The smaller controls the bigger. By having an extremely small valve, with a correspondingly small nozzle, the forces to keep it air-tight and therefore to open it are much smaller. In addition, since the force to keep the bigger valve shut comes from the interstage pressure itself and is controlled via the servovalve, it doesn't require sharp edged seals and it can be greatly increased in respect of outlet area to achieve very high air-flow capacity.

A common misconception regarding the Jetstream servo valve is that since the servo valve is an upstream opening valve, in case of an increased interstage pressure the servo will shut, preventing the main valve from opening.

This is incorrect. The Jetstream second stage is equipped with a safety valve in case a high pressure airflow occurs. This safety valve prevents the airstream from flowing out through the mouthpiece straight into your mouth. Instead, the construction will release the air into the water via the hose. In all cases it is possible to breathe from the second stage.

What is a breathing curve?
Have you ever thought of how you breathe? When you inhale and exhale you create something called a breathing curve or a loop. A breathing loop is also a way of measuring the performance of a regulator and is measured in Joules per litre (see picture). For example the total work of breathing might be 0,75J/l. The figure shown in charts is normally the sum of inhalation and exhalation with an optimised regulator in a test bench, which means it does not show if the inhalation was extremely high and exhalation extremely low or vice versa.

Some regulators rely on knobs and levers to be manually adjusted. To get optimum performance out of such a regulator as you descend or ascend is extremely hard as there are many parameters to consider. Our idea is that this should work automatically.

At Poseidon we focus on inhalation resistance as breathing out is easy for the human body. The Cyklon achieves this through overall design and the Jetstream and Xstream by servotechnology. The servo valve is unaffected by depth or what pressure it has to work at, as the force required to open it is extremely low. Next time you ask about a regulator's breathing curve ask them about inhalation resistance and if the regulator adjusts this automatically so that you don't end up being the regulator.

GLOSSARY OF TERMS USED

Balanced – this means that the regulated pressure is independent from the upstream pressure, e.g. IP independent from cylinder pressure, or breathing pressure independent from IP. The conventional way to obtain this is to arrange the valve in such a way that the upstream pressure either: acts only on surfaces perpendicular to the opening and closing direction, thereby having no effect on opening and closing forces; or the upstream pressure leads through the valve to an opposite surface of equal area, leading to an automatic equalisation (balancing) of forces in the opening and closing direction.

Either way, it leads to a more stable performance and higher regulating precision.

Upstream valve vs. downstream valve – an upstream valve opens in a direction opposite of the flow direction which will be established when the valve opens.
A downstream opens in the same direction as the subsequent flow. An upstream valve will seal tighter and tighter with an increasing upstream pressure, while a downstream will open when upstream pressure reaches a certain threshold pressure.

SCUBA regulators with upstream valves must have something acting as a pressure relief valve somewhere in the line, to ensure that explosions are not caused in case of an excessive pressure. Downstream valves will open spontaneously, but if used, for example, in 2nd stages, will be more prone to start free-flowing under the same circumstances.

p/v loop, breathing diagram - A p/v loop is a way to visualise a regulator's breathing performance by plotting the breathing pressure over the displaced volume. Most often, the breathing starts with an inhalation to the right at the x-axis, and the inhalation forms a graph ideally close to the x-axis. When exhalation starts, the graph plotter turns and goes back again on the positive side of the x-axis until the inhaled volume has again been exhaled. This then forms a "pressure/ volume loop". The x-axis intersects with the y-axis exactly at the actual pressure at depth, and can be said to be the target regulator pressure. If both the inhalation and exhalation curve did not deviate from the target pressure whatsoever, we would have a perfect regulator, with no inhalation- or exhalation-resistance.

Norsok U-101 – Since the EN 250 standard only states-dynamic performance testing to a maximum depth of 50m, and accordingly requires a maximum approved diving limit to 50m, it cannot be used for type approving regulators capable of more. The Norwegian Off-Shore industry has established standards similar to the EN 250 which describes testing down to 400m. This standard was accepted by the notified body to be used to approve the first ever Open Circuit SCUBA regulator to be approved for use down to 200m – the Xstream.
The standard can be viewed at: http: //www.standard.no/pronorm-2/data/f/0/01/49/1_10704_0/U-101-N.pdf

GAUGES

The gauges come in two different colors, the traditional yellow dial and the new with a black dial. Both versions come with either bar or psi and they are also available as double console with a depth meter.

MODEL:

Cirrus Pressure Gauge with Hose

Double Console in Black

Pressure Gauge in Black

Double Console in Yellow

Manometer Mini BAR

Manometer Mini PSI

Compass Cirrus

Art. no.	Description
7929	Pressure gauge Cirrus w hose BAR
0600-001	Double Console Cirrus, Black
0600-000	Pressure Gauge Cirrus, Black
8671	Double Console Cirrus w hose BAR, Yellow
001-95	Manometer Mini BAR
002-06	Manometer Mini PSI
8672*	Compass Cirrus Cover + Holster

TECHNICAL FEATURES:

Cirrus Pressure Gauge with Hose
This 300 bar (4350 psi) pressure gauge is a small model that will not be in the way during the dive. Made of robust metal and packed with Poseidon's 300 bar kevlar reinforced hose. Also available with PSI scale.

Double Console in Black
Our double console in a new design, with black display and fluorescent numbers. Pressure gauge shows both BAR and PSI. Comes with a 80 cm HP hose.

> Black display

> Depth gauge to 80 metres

> Display shows both Bar and PSI

Pressure Gauge in Black
Our pressure gauge in a new design, with black display and fluorescent numbers. Pressure gauge shows both BAR and PSI. Delivered with a 80 cm HP hose.

REBREATHER BCD

The rebreather BCD is the first of its kind and features include integrated exchangeable lungs, weight system and the Poseidon individual patch system. The rebreather BCD is constructed to the highest quality and durability using ballistic nylon, YKK zippers and hand crafted detailing. Available in 4 colors.

> Integrated exchangeable lungs
> Weight system
> Individual patch system

MATERIAL:

Premium black version in Nylon 1680.
Color versions in red, made in Cordura 1000.
YKK Waterproof Zippers. Inflator with stainless steel mechanism.

TECHNICAL FEATURES:

Integrated counter lungs, Integrated weightpockets, Case for crotch strap,
Velcro for patches or gauntlet.

0005-100	QMR	Quickly attached MK VI to BCD or Harness
0650-031/032/033	Wing Man	To use for your bailout bottle

THE POSEIDON WING AND BACKPLATE

The Wing & Backplate is tailored to fit the POSEIDON SE7EN but is also an excellent choice for SCUBA diving purposes.
The Poseidon Wing & Harness have been designed to sustain good buoyancy and fit. Therefore they are the preferable choice of buoyancy device.

Made in Ballistic nylon with an integrated deflate system and custom made back plate.

The webbing and buckle system is adapted from the Poseidon platform.

The black aluminum backplate is covered in Nylon for protection and a higher comfort.

The four D-rings will make it easy to attach your bailout tank/-s or anyother equipment you would like to take along on your dive.

COLLECTION COLORS

ONE WING & ONE HARNESS

Poseidon's single tank wing is now available in the ONE design. Featured in 2 colors and made in Cordura™ 1000. Designed for beginners and for more experienced divers, the One Wing 50 is a sport wing with excellent volume increase and superior bladder deflation capabilities. When deflated, the ClamRetract system helps to reduce size and drag to the minimum. Four dump valves and an inflator with a stainless steel mechanism ensure inflation and deflation is always controlled and safe; and the shape of the bladder compensates for the weight of the tank when submerged and gives you freedom to move in any direction. The narrow air passage behind the neck is designed not to impede head movement or foul regulators and hoses when inflated.

The One Wing is made for equipment with a negative weight in water that does not exceed 19 kg (41.6 lbs) and has a lifting capacity of 225 N. It comes with a double, non-flex tank-band tank attachment system and can also be equipped with integrated weight pockets, accessory pockets, metal back plate, pinbolt kit and D-rings.

The standard size has a waist belt with three rows of 40 cc holes; and the large size has six rows.

COLLECTION COLORS

ONE SUIT SPORT (NEOPRENE)

Poseidon's versatile, multipurpose wetsuit. The range covers all aspects of diving from tropical to cold waters. The One Suit Sport is made of first grade neoprene with a jersey lining and a nylon outer shell for extra durability. The suit is based on the unique design of the One Suit Membrane and features the straight arm and leg openings for easier use with boots and gloves.

MATERIAL:

Available in 5MM Neoprene in 2 Colours: Red and Black.

TECHNICAL FEATURES:

Ultra comfortable neoprene with superstrech on sides for perfect fit, pre-bent arms and legs with smooth skin neoprene water seals for enhanced protection and comfort.

Jako Geoprene gives you the most comfortable fit.
Extended neck minimizes water circulation.
Taped seams give enhanced durability.
Smooth skin inside for comfort and easy don and doff.
Perfect for use with full face masks.

ATMOSPHERE

It is approved for cold water, and in combination with the mask features a unique highly effective de-fogging system which keeps the field of vision clear even at water temperatures close or equal to freezing point.
The mask has an anti-distortion visor, with frosted sides to prevent reflections.
The mask is an over pressure mask which reduces the risk of contaminated water entering the mask during a dive.
The mask can of course be used in all altitudes without free-flowing.

COLLECTION COLORS

Black

Art. no.	Description
4960-M-BK	Atmosphere M Complete
4900-M-BK	Atmosphere M w. 2:nd stage

Any standard communication system will fit the Poseidon mask.
The mask has external buoyancy compensating weights which can also be used for mounting torches, video-cameras etc. Developed initially for fighter plane pilots the mask was designed to be worn for up to six hours when the plane flies through chemical or biological war zones.

TECHNICAL FEATURES:

For optimum performance, the Atmopshere should be connected to an Xstream 1st stage.

> Highly effective de-fogging system
> Anti-distortion visor
> Prepared for communication system

WEIGHT FOR ATMOSPHERE

Art. no.	Description
0005-195*	Weight for Atmosphere, pair

ATMOSPHERE
with Jetstream P.P. 2nd stage

Many technical divers, as well as the Swedish and American Navy, have chosen Jetstream as their favourite. The construction's simplicity guarantees high performance – as well as safety – regardless of diving conditions. This gives a regulator that is easy to breathe at any depth.
Tests conducted by the American Navy show that the Jetstream is the only regulator that, in cold water dives, manages to deliver the correct amount of air at extreme depths and rate of breathing. Jetstream also won the Swedish Navy's highest classification
– of course well within the objective breathing test in cold waters.

POSEIDON FACT ATMOSPHERE

Poseidon is the only manufacturer with mouthpiece regulators approved for cold water service by US Navy. For details go to *http://www.supsalv.org/pdf/ANU.pdf*

ATMOSPHERE PACKAGE

> Regulator with 70 cm hose

BLACK LINE MASK

High performance and high style are combined in the new Poseidon Black Line Mask, featuring LVSL© technology.

COLORS

Black Red

Art. no.	Description
0720-160	Black Line Mask
0720-140*	Red Line Mask

MATERIAL:

Ultra clear lens.
Silicone (alt. neoprene) strap.

TECHNICAL FEATURES:

Enhanced field of vision from angled lens.
Easy to clear low volume profile.
Flood resistant extra deep, ultra soft skirt.
Works great with beards.
Poseidon's Black Line Mask was inspired by rebreather divers who need the maximum field of vision combined with a minimal gas requirement toclear the mask. To answer their needs, we developed LVSL © Low-Volume Single-Lens technology to give a unique combination of features that benefit all divers.

THREEDEE

A low volume mask that fits most faces. A robust frame and with optical lenses.

COLORS

BK/black, with black silicone | BK/kevlar, with black silicone | BK/yellow, with black silicone | BK/yellow, with clear silicone | BK/red, with black silicone | Pink/white, with clear silicone

Art. no.	Description
8700-BKBK BS	Mask 3D - Black/Black, BS
8700-BKKV BS	Mask 3D - Black/Kevlar, BS
8700-BKYW BS	Mask 3D - Black/Yellow, BS
8700-BKYW CS	Mask 3D - Black/Yellow, Clear Silicone
8700-BKRD BS	Mask 3D - Black/Red, BS
8700-PIWH CS	Mask 3D - Pink/White, Clear Silicone
8701-XX-L*	Lens Mask 3D - Left
8701-XX-R*	Lens Mask 3D - Right

MATERIAL:

Our exclusive ultra-light two-lens mask has an ultra-light polymer frame and comfort fit skirt in high quality silicone.
The side buckles swivel 45 degrees and are strong and easy to adjust.
Colors include matte and metallic surfaces, and 'Poseidon yellow'.

TECHNICAL FEATURES:

Prescription lenses available online.
Lens 3D from -1,5 to -9,0 in steps of o,5.
Comfort fit suits most face shapes.
Easy to clear thanks to low volume profile.

TECHNICA

Classic mask with ultra low volume.
Very popular among technical divers and free divers.

COLORS

Black/grey

Art. no.	Description
8684-GKGA BS	Mask Technica,grey/black gomma

MATERIAL:

A compact mask with rubberised surface and double glass.

TECHNICAL FEATURES:

Perfect free-diving mask. Easy to clear, ultra-low-volume.
Stand-out rugged, stylish look.
Poseidon's Technica Mask was inspired by free-divers who need the minimum gas requirement to clear their masks. The Technica Mask's rugged looks will set you apart from the crowd and perform flawlessly.
Dive after dive.

BLACK LINE SNORKEL

Lightweight. Foldable. Functional.
The new Poseidon Black Line Snorkel.

COLORS

Black

Art. no.	Description
0730-000	Black Line Snorkel

MATERIAL:

Silicone mouthpeice with TPR tube.

TECHNICAL FEATURES:

Lightweight and compact for easy travel.
Foldable design for easy storage on dives.
Wraparound design for streamlined swimming.
Perfect companion to any Poseidon Mask.

SNORKELING FIN

A shorter version of the Diving Fin, intended for the travelling snorkeler. Rigid rubber construction for good force.

ONE SUIT SPORT (NEOPRENE)

Poseidon's versatile, multipurpose wetsuit. The range covers all aspects of diving from tropical to cold waters. The One Suit Sport is made of first grade neoprene with a jersey lining and a nylon outer shell for extra durability. The suit is based on the unique design of the One Suit Membrane and features the straight arm and leg openings for easier use with boots and gloves.

MATERIAL:

Available in 5MM Neoprene in 2 Colours: Blue and Grey.

TECHNICAL FEATURES:

Ultra comfortable neoprene with superstrech on sides for perfect fit, pre-bent arms and legs with smooth skin neoprene water seals for enhanced protection and comfort.

0337-086	Rebreather BCD Grey L
0337-087	Rebreather BCD Grey XL

WING BESEA D100 & W100

COLLECTION COLORS

Black

Art. no.	Description
000-40	Wing Besea D100
0334-000	Wing Besea W100

For technical diving the W100 or the D100 is the right choice. The W100 is a single bladder tech-wing purpose-designed. The D100 is a dual bladder tech-wing for divers requiring redundancy. The W100/D100 is made for equipment with a negative weight in water that does not exceed 30 kg, with a lifting capacity of 368 N.

The air passage behind the neck is narrow enough to avoid pushing the head forward or interfering with the regulator and hoses when inflated.

TECHNICA SNORKEL

Designed with comfort and heavy usage in mind, the Technica Snorkel delivers rugged dependability.

COLORS

Black

Art. no.	Description
0730-002	Technica Snorkel

MATERIAL:

Silicone mouthpeice with TPR tube.
